

MANAGING PLAYER TRANSFERS → CLUBS & ASSOCIATIONS

As a Club or an Association, you play an important role in facilitating player transfers from Club to Club anywhere in the country.

Here are the steps to manage transfers:

Step 1: **Player initiates transfer**

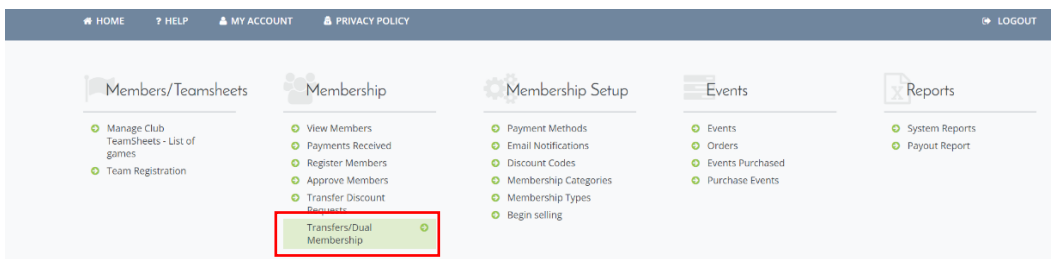

The player initially creates the transfer in their portal by logging in and completing the process of requesting the transfer (you can view how to do this [here](#)).

Step 2: **Clubs & Associations Approval Process**

After the process has been started by the player, **all** Transfers and Dual Memberships **require** the approval of:

- **Outgoing Club**
- **Outgoing Association**
- **State Association**
- **Incoming Association**
- **Incoming Club**

To manage the process from your admin panel, go to **Transfers/Dual Memberships**

Here you can view all your Member Transfers/Dual Membership activity

On this screen you can analyse what stage the transfer is up to, and what, if any further approvals are required.

Step 3: Player activates transfer

The player finally activates the transfer in their portal by logging in and completing the process (you can view how to do this [here](#)) once it's all approved.
